WHAT WE DO

Two services, one goal: never lose a customer to a slow site or a missed call.

Website Development

Modern, responsive, fast websites for small and medium-sized businesses — designed to build trust and turn visitors into inquiries.

About our web work ↗

AI Voice Agents

Inbound AI agents that answer business calls, handle routine questions, capture leads, and support appointment booking — around the clock.

About voice agents ↗

WHY RELAY

Engineering discipline, applied to your online presence.

Speed is a feature

Slow pages lose customers before they read a word. Every build targets Core Web Vitals best practices, optimized images and minimal scripts — measured, not guessed.

CORE WEB VITALS
MOBILE-FIRST
SEMANTIC HTML
ACCESSIBLE COMPONENTS

Lead capture built in

Forms, call handling and booking flows designed to route every inquiry somewhere useful — not into a void.

Modern engineering

Clean, maintainable code your future developers will thank you for. You own everything we build.

Honest by default

We label concept work as concept work and won't publish a metric we can't stand behind. Trust is the product.

Built for phase two

Automated audits, CRM and deeper AI automation are on our roadmap — your site is architected to grow into them.

AI VOICE AGENTS — LIVE DEMO

Hear how a missed call becomes a booked appointment.

This simulated transcript shows the kind of inbound flow an agent handles: answering routine questions, offering real availability, confirming the booking. No hold music, no callback queue.

This is a scripted demonstration of the

Inbound call — simulated
